

## 英文簡歷

Let me introduce myself. I am 21 years old, born in I-Lan, and I am currently a junior student at Ming- Chuan University. My major is electronic engineering, I will be graduating next June and get a bachelor degree. In the past 3 years, I spend most of my time on study and socialize. I'm preparing for the TOEFL test this September; By learning the expert knowledge, I have acquired basic knowledge of my major both in theory and in practice. Besides, I have attended several activities, which was hold by our student organization and I was one of cadres in the organization, through those activities, I have deeply understanding how to organize a group, and was totally extend my socialization, it could help me when I faced a problem. I have lots of interest, such as singing, jogging and drawing, I usually spent my free time go jogging or playing basketball with my friends. After all, I know English is very important, so I go to cram school in Monday Tuesday and Friday every week to improve English, I hope that after graduated, English could connect with my major and make me find job easier.
